EXECUTIVE PROFILE

Results-driven **Senior Business Intelligence Analyst & Analytics Lead** with ~4 years of progressive experience architecting scalable **BI ecosystems**, **automated ETL/ELT pipelines**, and enterprise **decision-intelligence platforms** across SaaS, PaaS, healthcare, finance, retail, and B2B distribution. Demonstrated track record of delivering measurable business impact — steering a $200M+ ARR portfolio at Optimizely and enabling $60M+ in operational decisions at ShopUp — through expert mastery of **Power BI, Advanced DAX, Snowflake SQL, Python (pandas / NumPy / scikit-learn), dbt,** and **Tableau**.

Recognized as a **Single Source of Truth (SSOT) architect** and **cross-functional strategic analytical partner** trusted by C-suite and VP-level stakeholders. Specializes in transforming ambiguous, high-volume data into **prescriptive narratives**, **self-service intelligence platforms**, and **zero-downtime BI infrastructure**. Experienced in **mentoring analyst teams**, defining **OKR-aligned KPI frameworks**, enforcing **data governance** at scale, and shipping **CI/CD pipelines** for BI deployments. Core competencies span **A/B experimentation**, **cohort analysis**, **predictive ML modeling**, **revenue operations (RevOps) analytics**, and **go-to-market (GTM) intelligence**.

PROFESSIONAL EXPERIENCE

Optimizely

Jan 2025 – Present

Senior Business Intelligence Analyst – Analytics & Data

Dhaka, Bangladesh (Remote, Global)

- **Spearheaded** end-to-end **BI strategy and analytics leadership** for 10+ cross-functional departments, orchestrating scalable **data products** that drove **Go-To-Market (GTM) strategy** for a $200M+ ARR portfolio, directly influencing product adoption, pricing, and expansion decisions across global markets.
- Identified $20M+ in **pipeline visibility** gaps and influenced enterprise **revenue operations** growth by translating complex raw data anomalies into prescriptive business opportunities, **product analytics** signals, and customer lifecycle insights for VP- and C-suite audiences.
- **Architected** automated, high-throughput **ETL/ELT workflows** and **dimensional data models** in **Snowflake** using **Python** and **Advanced SQL**, establishing a robust backend infrastructure processing 500M+ rows daily with sub-second query response times.
- Integrated multi-source APIs (**Salesforce**, **Marketo**, Intellum, CMS/Commerce) into unified **data lake** layers, accelerating pipeline processing speed by 60–80% and reducing data latency to near real-time via **stream processing** patterns.
- Defined and standardized **business-critical KPIs** (ARR, CLV, Pipeline Coverage, CSAT, NRR), reducing reporting inconsistencies by over 30% across 400+ global users and establishing a **Single Source of Truth (SSOT)** — the foundational **data governance** framework adopted org-wide.
- **Directed** the complete lifecycle of 30+ interactive enterprise **Power BI** dashboards with advanced **DAX** and **tabular modeling**, decreasing manual reporting bottlenecks by 40+ hours monthly and enabling real-time **executive reporting** and performance tracking.
- Managed integration of **embedded analytics** within customer-facing platforms, delivering on-demand **self-service analytics**

to external partners and achieving a **25%** measurable increase in platform engagement and adoption.

- Executed advanced **lifecycle analytics**, **statistical forecasting**, and rigorous **A/B testing** / **experimentation** evaluations to identify churn risks, improving **customer retention modeling** accuracy by **18%**.
- Collaborated with **data engineering** teams to establish **CI/CD pipelines** for BI deployments using **Git version control**, ensuring zero-downtime dashboard updates and accelerating release cycles from weeks to days.
- **Championed** strict **data governance**, validation protocols, and **data quality** frameworks; **mentored** **5+** junior analysts, decreased dashboard failure rates by **40–50%**, and reduced ad-hoc engineering requests by **30%** through **self-service enablement** programs.
- *Recognitions:* Formal Bonusly Recognition · Cross-Channel Peer Recognition

Mokam CPG – ShopUp

Oct 2023 – Dec 2024

Sales Data Analyst – Sales Capability & BI

Dhaka, Bangladesh

- **Guided** **$60M+** in critical operational, credit, and financial decisions by defining actionable metrics and executing comprehensive **exploratory data analysis (EDA)** across the full B2B sales lifecycle.
- **Architected** and optimized resilient **ETL data pipelines**, aggregating complex schemas (**50+ GBs** daily) from Metabase, Excel, and proprietary **SQL databases** to ensure end-to-end **data integrity** and auditability.
- Engineered unified, production-ready datasets reducing manual data preparation by **50%** (saving ~**25 hrs/week**) across **10+** teams, enabling **decision-grade analytics** that accelerated reporting workflows by **40%**.
- Developed advanced **DAX** calculations and reusable logic layers, standardizing **sales KPIs** (deposits, claims, SCR) for scalable metric consistency across **5** distinct regional departments — a **data modeling** standard subsequently adopted company-wide.
- Deployed **30+** dynamic **Power BI** dashboards powered by robust **tabular data modeling** and validated Metabase queries, serving **150+** Daily Active Users (DAU) across **sales operations**.
- Performed advanced **cohort analysis** and longitudinal **revenue tracking** to identify high-risk segments, enabling proactive **sales interventions** that decreased MoM customer churn by **12%**.
- Designed and enforced robust **data quality frameworks** and data dictionaries using Atlan and Confluence, minimizing metric discrepancy issues by **90%** and accelerating onboarding of new analysts by **3 weeks**.
- Increased operational efficiency by **35%** by automating repetitive analytical processes, fostering a **data-driven culture**, and empowering sales teams with localized **self-service decision intelligence**.
- *Recognitions:* Best Performing Team Q4 2023 · Pace Over Perfection Award

AponTech Ltd.

Dec 2022 – Sep 2023

Associate Data Analyst – MIS & Growth Analytics

Dhaka, Bangladesh

- Designed targeted, **data-driven promotional strategies** retaining **20,000+** high-value users and achieving a **50%** increase in average monthly basket size (**$16** → **$24**).
- Developed **predictive ML models** in **Python (scikit-learn)** and complex **SQL** scripts to analyze discount sensitivity, achieving demand forecasting accuracy of **85%+**.
- Executed granular **customer segmentation** on **100,000+** users based on dynamic purchasing behaviors, optimizing overall campaign ROI by **22%**.
- Automated daily **anomaly detection** alerts for supply chain disruptions and pricing deviations using **Python** scripts, eliminating **10+ hrs/week** of manual log review and mitigating an estimated **$150K** in annual revenue leakage.
- Built and deployed real-time **Power BI** reporting frameworks and executive KPI scorecards, reducing ad-hoc reporting dependencies by **30%** for **50+** stakeholders.
- Supported cross-functional leadership with **budget analysis**, product demand forecasting, and **inventory optimization**, driving a **15%** reduction in excess warehouse holding costs.

DataWorks Ltd. (A Concern of Data Crafters LLC)

May 2022 – Nov 2022

Data Analyst Intern – Enterprise Data & Reporting

Houston, TX, USA (Remote)

- Supported enterprise **data availability** by building foundational **ETL pipelines** and optimizing legacy **SQL** queries, reducing average query execution time by **25%** across **3** business units.
- Assisted cross-functional teams in tracking core program performance by designing and maintaining targeted **campaign KPI dashboards** and **data visualizations**.

Accomplishments – DataWorks Internship Period

- Introduction to Data Modeling for Power BI – SQLBI (2022)
- Data Modeling for Power BI – SQLBI (2022)
- Introducing DAX – SQLBI Video Course (2022)
- DAX Patterns – SQLBI (2022)
- Power BI Dashboard Design – SQLBI (2022)
- Build Your First Machine Learning Pipeline – Dataiku / Coursera (2022)
- COVID-19 Data Analysis Using Python – Coursera (2022)

CERTIFICATIONS

PL-300: Power BI Data Analyst
Microsoft Certified
Issued: 2023 · ID: 3BB17D0B5D0736D4

DAX Expert Certification
SQLBI Certified

EDUCATION

Bangladesh University of Professionals

Jan 2016 – Dec 2019

B.Sc. in Information and Communication Engineering

Dhaka, Bangladesh

Relevant Courses: Database Management Systems, Data Structures & Algorithms, Data Warehousing & Data Mining, Artificial Intelligence & Neural Networks, Distributed Systems, Business Analytics

LEADERSHIP PHILOSOPHY & MEASURABLE OUTCOMES

People-First, Data-Always: Led analytics teams by establishing psychological safety while demanding rigorous data standards. The best **BI leaders** are translators: equally fluent in SQL and in executive storytelling. *Outcome: 5+ analysts promoted to independent contributors within 12 months.*

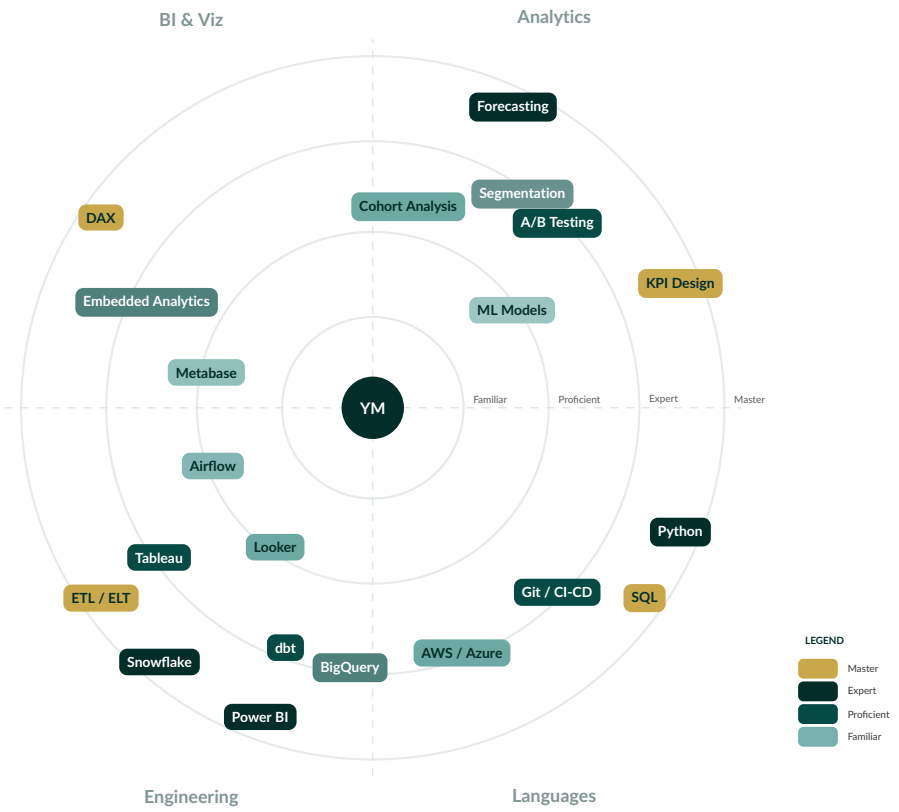
Mentorship as a Multiplier: Designed structured onboarding frameworks that reduced analyst time-to-productivity by **3 weeks** and cut dashboard failure rates by **40–50%**. *Outcome: 30% reduction in ad-hoc engineering requests through self-service enablement.*

Strategic Ambiguity Orientation: Consistently the first call when stakeholders couldn't define the question at both Optimizely and ShopUp. Excels at scoping ambiguous problems, proposing analytical frameworks, and aligning cross-functional teams on shared KPI definitions before a single query is written. *Outcome: 30% reduction in reporting inconsistencies across 400+ global users.*

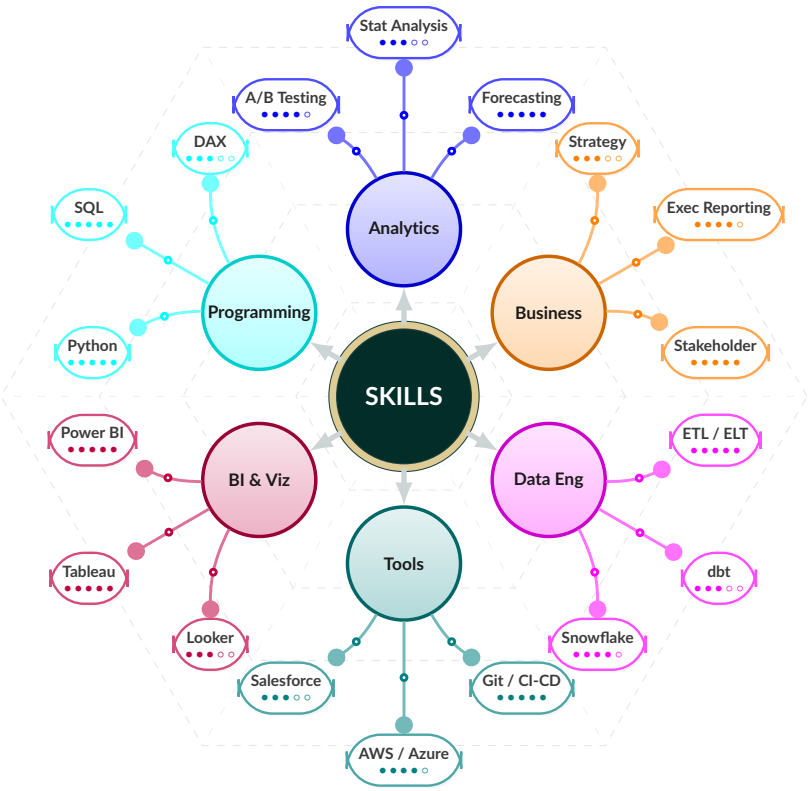
CORE COMPETENCIES

Domain	Capabilities & Tools
Programming & Querying	SQL (Advanced T-SQL, Stored Procedures, Performance Tuning), Python (pandas, NumPy, scikit-learn, matplotlib, seaborn), DAX (Advanced), Micro-optimized Queries
Analytics & Experimentation	A/B Testing & Experimentation, Predictive & Prescriptive Modeling, Statistical Analysis, Forecasting, KPI Design, Cohort & Funnel Analysis, Customer Segmentation, Scenario Modeling, Revenue Operations (RevOps) Analytics, Product Analytics
BI & Visualization	Power BI (Expert, PL-300), Tableau, Looker, Metabase, Embedded Analytics, Self-Service Analytics, Executive Reporting, Analytical Narratives, Scalable Dashboards, KPI Scorecards
Data Engineering & Architecture	ETL/ELT Pipelines, Snowflake, BigQuery, dbt, Dimensional Modeling, Data Lake & Warehouse Architecture, Cloud Platforms (AWS / Azure), Stream Processing, Data Governance, Data Quality Frameworks, CI/CD for BI (Git)
Business & Strategic Skills	Stakeholder Management, Executive Communication & Storytelling, GTM & Revenue Analytics, Cross-functional Collaboration, OKR Alignment, Strategic Decision Support, Analytical Leadership, Mentorship & Coaching, Operational Excellence, Data-Driven Culture Building
Tools & Platforms	Excel (Advanced), Git, Jira, Confluence, Atlan (Data Catalog), Salesforce, Marketo, Snowflake, BigQuery, dbt, Dataiku, Databricks (familiar), Fivetran, Cloud Analytics Platforms

TECHNOLOGY RADAR



SKILLS CONSTELLATION



KEY PROJECTS

Project	Stack	Contribution	Scale	Impact	Link
Sales Sight 360	Power BI · DAX	End-to-end KPI dashboard; dimensional model + advanced DAX measures	150+ DAU	+20% visibility	
Rise of Discipline	DAX · Power BI	Habit-tracking metric engine; behavioral analytics + longitudinal trends	Personal	Enhanced engagement	
Retail Cust. Metrics	SQL · Power BI	Retail operations KPI dashboard; optimized query layer	Enterprise	Reduced latency	
Retail Cust. Analytics	Python · sklearn	Churn prediction + segmentation; Random Forest + k-means	100K+ users	85% accuracy	
Healthcare Analytics	DAX · Power BI	Clinical outcome models; executive reporting layer for operational KPIs	Multi-dept	Improved decisions	
Playing with ETL	Azure · Python	Automated pipeline orchestration using Apache Airflow DAGs	Daily pipe	5 hrs/wk saved	
Pipeline Trend	SQL · Power BI	GTM forecasting dashboard; trend decomposition + scenario analysis	GTM-wide	Data-driven GTM	
Customer Intelligence	SQL · Python	Decision intelligence framework; NPS + CLV + churn analytics	Exec-level	C-suite insights	
Campaign Finance	DAX · Power BI	Campaign spend + multi-touch attribution modeling; budget optimization	Multi-channel	15% ROI gain	

Full portfolio – 30+ dashboards, ML models, and ETL pipelines View All

AWARDS & PROFESSIONAL RECOGNITION

OPTIMIZELY · 2025

Formal Bonusly Recognition

Peer-nominated for exceptional cross-functional BI impact. Awarded by senior leadership for architecting the $200M+ ARR analytics framework.

View credential

OPTIMIZELY · 2025

Cross-Channel Peer Recognition

Acknowledged by 5+ cross-functional teams — Sales, Product, Engineering & Marketing — for analytical leadership and data quality advocacy.

View credential

SHOPUP · Q4 2023

Best Performing Team Award

Delivered the Sales Sight 360 suite — operational backbone for 150+ DAU across regional sales operations.

View credential

SHOPUP · 2024

Pace Over Perfection Award

Recognized for driving 35% efficiency gains through rapid automation and building a self-service analytics culture across 10+ teams.
