EXECUTIVE PROFILE

Results-driven **Senior Business Intelligence Analyst & Analytics Lead** with ~4 years of progressive experience architecting scalable **BI ecosystems**, **automated ETL/ELT pipelines**, and enterprise **decision-intelligence platforms** across SaaS, PaaS, healthcare, finance, retail, and B2B distribution. Demonstrated track record of delivering measurable business impact — steering a $200M+ ARR portfolio at Optimizely and enabling $60M+ in operational decisions at ShopUp — through expert mastery of **Power BI, Advanced DAX, Snowflake SQL, Python (pandas / NumPy / scikit-learn), dbt,** and **Tableau**.

Recognized as a **Single Source of Truth (SSOT) architect** and **cross-functional strategic analytical partner** trusted by C-suite and VP-level stakeholders. Specializes in transforming ambiguous, high-volume data into **prescriptive narratives**, **self-service intelligence platforms**, and **zero-downtime BI infrastructure**. Experienced in **mentoring analyst teams**, defining **OKR-aligned KPI frameworks**, enforcing **data governance** at scale, and shipping **CI/CD pipelines** for BI deployments. Core competencies span **A/B experimentation**, **cohort analysis**, **predictive ML modeling**, **revenue operations (RevOps) analytics**, and **go-to-market (GTM) intelligence**.

PROFESSIONAL EXPERIENCE

Optimizely

Jan 2025 – Present

Senior Business Intelligence Analyst – Analytics & Data

Dhaka, Bangladesh (Remote, Global)

- **Spearheaded** end-to-end **BI strategy and analytics leadership** for 10+ cross-functional departments, orchestrating scalable **data products** that drove **Go-To-Market (GTM) strategy** for a $200M+ ARR portfolio, directly influencing product adoption, pricing, and expansion decisions across global markets.
- Identified $20M+ in **pipeline visibility** gaps and influenced enterprise **revenue operations** growth by translating complex raw data anomalies into prescriptive business opportunities, **product analytics** signals, and customer lifecycle insights for VP- and C-suite audiences.
- **Architected** automated, high-throughput **ETL/ELT workflows** and **dimensional data models** in **Snowflake** using **Python** and **Advanced SQL**, establishing a robust backend infrastructure processing 500M+ rows daily with sub-second query response times.
- Integrated multi-source APIs (**Salesforce**, **Marketo**, Intellum, CMS/Commerce) into unified **data lake** layers, accelerating pipeline processing speed by 60–80% and reducing data latency to near real-time via **stream processing** patterns.
- Defined and standardized **business-critical KPIs** (ARR, CLV, Pipeline Coverage, CSAT, NRR), reducing reporting inconsistencies by over 30% across 400+ global users and establishing a **Single Source of Truth (SSOT)** — the foundational **data governance** framework adopted org-wide.
- **Directed** the complete lifecycle of 20+ interactive enterprise **Power BI** dashboards with advanced **DAX** and **tabular modeling**, decreasing manual reporting bottlenecks by 40+ hours monthly and enabling real-time **executive reporting** and performance tracking.
- Managed integration of **embedded analytics** within customer-facing platforms, delivering on-demand **self-service analytics**

to external partners and achieving a **25%** measurable increase in platform engagement and adoption.

- Executed advanced **lifecycle analytics**, **statistical forecasting**, and rigorous **A/B testing** / **experimentation** evaluations to identify churn risks, improving **customer retention modeling** accuracy by **18%**.
- Collaborated with **data engineering** teams to establish **CI/CD pipelines** for BI deployments using **Git version control**, ensuring zero-downtime dashboard updates and accelerating release cycles from weeks to days.
- **Championed** strict **data governance**, validation protocols, and **data quality** frameworks; **mentored** **5+** junior analysts, decreased dashboard failure rates by **40–50%**, and reduced ad-hoc engineering requests by **30%** through **self-service enablement** programs.
- *Recognitions:* Formal Bonusly Recognition · Cross-Channel Peer Recognition

Mokam CPG – ShopUp

Oct 2023 – Dec 2024

Sales Data Analyst – Sales Capability & BI

Dhaka, Bangladesh

- **Guided** **$60M+** in critical operational, credit, and financial decisions by defining actionable metrics and executing comprehensive **exploratory data analysis (EDA)** across the full B2B sales lifecycle.
- **Architected** and optimized resilient **ETL data pipelines**, aggregating complex schemas (**2+ GBs** daily) from Metabase, Excel, and proprietary **SQL databases** to ensure end-to-end **data integrity** and auditability.
- Engineered unified, production-ready datasets reducing manual data preparation by **50%** (saving **~25 hrs/week**) across **10+** teams, enabling **decision-grade analytics** that accelerated reporting workflows by **40%**.
- Developed advanced **DAX** calculations and reusable logic layers, standardizing **sales KPIs** (deposits, claims, SCR) for scalable metric consistency across **5** distinct regional departments — a **data modeling** standard subsequently adopted company-wide.
- Deployed **30+** dynamic **Power BI** dashboards powered by robust **tabular data modeling** and validated Metabase queries, serving **150+** Daily Active Users (DAU) across **sales operations**.
- Performed advanced **cohort analysis** and longitudinal **revenue tracking** to identify high-risk segments, enabling proactive **sales interventions** that decreased MoM customer churn by **12%**.
- Designed and enforced robust **data quality frameworks** and data dictionaries using Atlan and Confluence, minimizing metric discrepancy issues by **90%** and accelerating onboarding of new analysts by **3 weeks**.
- Increased operational efficiency by **35%** by automating repetitive analytical processes, fostering a **data-driven culture**, and empowering sales teams with localized **self-service decision intelligence**.
- *Recognitions:* Best Performing Team Q4 2023 · Pace Over Perfection Award

AponTech Ltd.

Dec 2022 – Sep 2023

Associate Data Analyst – MIS & Growth Analytics

Dhaka, Bangladesh

- Designed targeted, **data-driven promotional strategies** retaining **20,000+** high-value users and achieving a **50%** increase in average monthly basket size (**$16** → **$24**).
- Developed **predictive ML models** in **Python (scikit-learn)** and complex **SQL** scripts to analyze discount sensitivity, achieving demand forecasting accuracy of **85%+**.
- Executed granular **customer segmentation** on **100,000+** users based on dynamic purchasing behaviors, optimizing overall campaign ROI by **22%**.
- Automated daily **anomaly detection** alerts for supply chain disruptions and pricing deviations using **Python** scripts, eliminating **10+ hrs/week** of manual log review and mitigating an estimated **$150K** in annual revenue leakage.
- Built and deployed real-time **Power BI** reporting frameworks and executive KPI scorecards, reducing ad-hoc reporting dependencies by **30%** for **50+** stakeholders.
- Supported cross-functional leadership with **budget analysis**, product demand forecasting, and **inventory optimization**, driving a **15%** reduction in excess warehouse holding costs.

DataWorks Ltd. (A Concern of Data Crafters LLC)

May 2022 – Nov 2022

Data Analyst Intern – Enterprise Data & Reporting

Houston, TX, USA (Remote)

- Supported enterprise **data availability** by building foundational **ETL pipelines** and optimizing legacy **SQL** queries, reducing average query execution time by **25%** across **3** business units.
- Assisted cross-functional teams in tracking core program performance by designing and maintaining targeted **campaign KPI dashboards** and **data visualizations**.

Accomplishments – DataWorks Internship Period

- Introduction to Data Modeling for Power BI – SQLBI (2022)
- Data Modeling for Power BI – SQLBI (2022)
- Introducing DAX – SQLBI Video Course (2022)
- DAX Patterns – SQLBI (2022)
- Power BI Dashboard Design – SQLBI (2022)
- Build Your First Machine Learning Pipeline – Dataiku / Coursera (2022)
- COVID-19 Data Analysis Using Python – Coursera (2022)

CERTIFICATIONS

PL-300: Power BI Data Analyst
Microsoft Certified
Issued: 2023 · ID: 3BB17D0B5D0736D4

DAX Expert Certification
SQLBI Certified

EDUCATION

Bangladesh University of Professionals

Jan 2016 – Dec 2019

B.Sc. in Information and Communication Engineering

Dhaka, Bangladesh

Relevant Courses: Database Management Systems, Data Structures & Algorithms, Data Warehousing & Data Mining, Artificial Intelligence & Neural Networks, Distributed Systems, Business Analytics

LEADERSHIP PHILOSOPHY & MEASURABLE OUTCOMES

People-First, Data-Always: Led analytics teams by establishing psychological safety while demanding rigorous data standards. The best **BI leaders** are translators: equally fluent in SQL and in executive storytelling. *Outcome: 5+ analysts promoted to independent contributors within 12 months.*

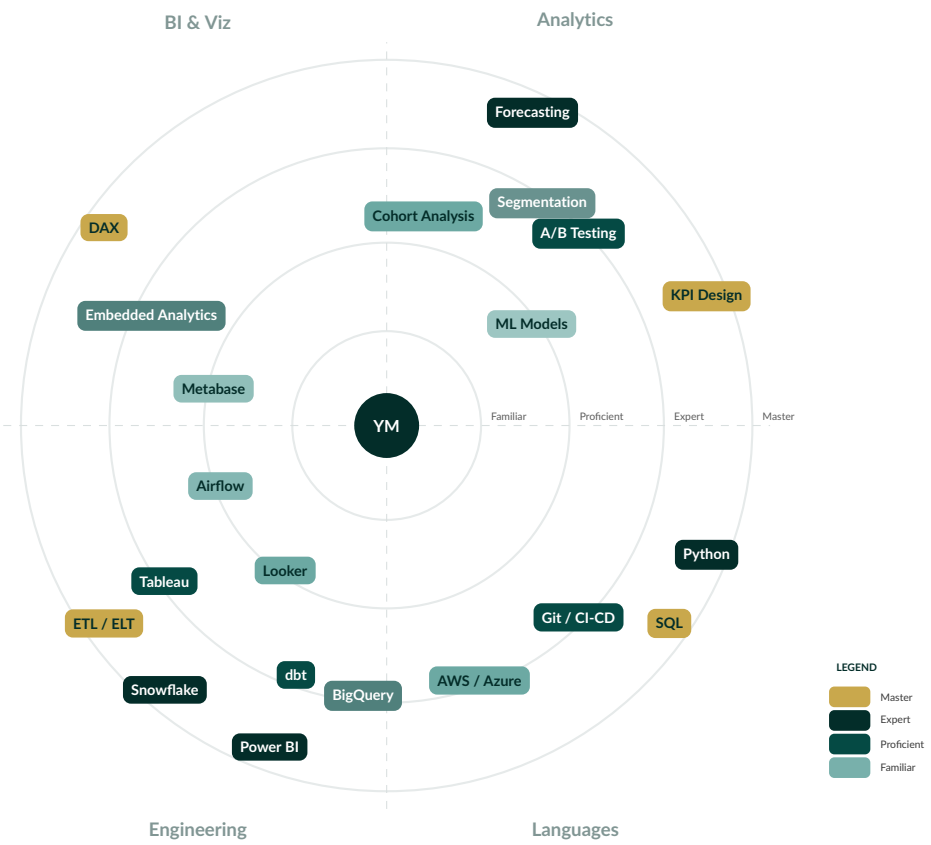
Mentorship as a Multiplier: Designed structured onboarding frameworks that reduced analyst time-to-productivity by **3 weeks** and cut dashboard failure rates by **40–50%**. *Outcome: 30% reduction in ad-hoc engineering requests through self-service enablement.*

Strategic Ambiguity Orientation: Consistently the first call when stakeholders couldn't define the question at both Optimizely and ShopUp. Excels at scoping ambiguous problems, proposing analytical frameworks, and aligning cross-functional teams on shared KPI definitions before a single query is written. *Outcome: 30% reduction in reporting inconsistencies across 400+ global users.*

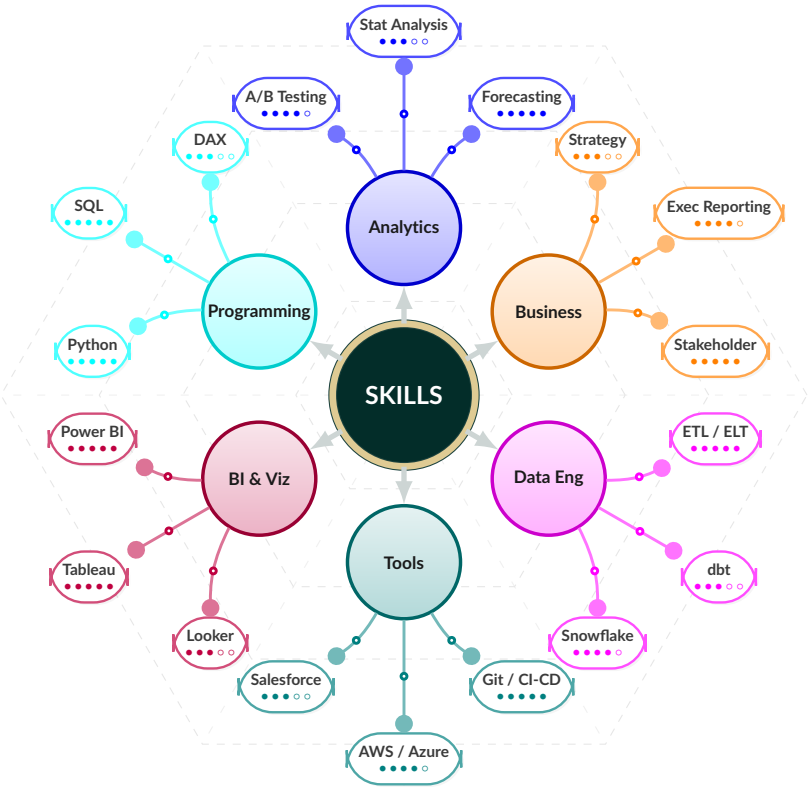
CORE COMPETENCIES

Domain	Capabilities & Tools
Programming & Querying	SQL (Advanced T-SQL, Stored Procedures, Performance Tuning), Python (pandas, NumPy, scikit-learn, matplotlib, seaborn), DAX (Advanced), Micro-optimized Queries
Analytics & Experimentation	A/B Testing & Experimentation, Predictive & Prescriptive Modeling, Statistical Analysis, Forecasting, KPI Design, Cohort & Funnel Analysis, Customer Segmentation, Scenario Modeling, Revenue Operations (RevOps) Analytics, Product Analytics
BI & Visualization	Power BI (Expert, PL-300), Tableau, Looker, Metabase, Embedded Analytics, Self-Service Analytics, Executive Reporting, Analytical Narratives, Scalable Dashboards, KPI Score-cards
Data Engineering & Architecture	ETL/ELT Pipelines, Snowflake, BigQuery, dbt, Dimensional Modeling, Data Lake & Ware-house Architecture, Cloud Platforms (AWS / Azure), Stream Processing, Data Gover-nance, Data Quality Frameworks, CI/CD for BI (Git)
Business & Strategic Skills	Stakeholder Management, Executive Communication & Storytelling, GTM & Revenue Analytics, Cross-functional Collaboration, OKR Alignment, Strategic Decision Support, Analytical Leadership, Mentorship & Coaching, Operational Excellence, Data-Driven Culture Building
Tools & Platforms	Excel (Advanced), Git, Jira, Confluence, Atlan (Data Catalog), Salesforce, Marketo, Snowflake, BigQuery, dbt, Dataiku, Databricks (familiar), Fivetran, Cloud Analytics Plat-forms

TECHNOLOGY RADAR



SKILLS CONSTELLATION



KEY PROJECTS

Project	Stack	Contribution	Scale	Impact	Link
Sales Sight 360	Power BI · DAX	End-to-end KPI dashboard; dimensional model + advanced DAX measures	150+ DAU	**+20%** visibility	
Rise of Discipline	DAX · Power BI	Habit-tracking metric engine; behavioral analytics + longitudinal trends	Personal	Enhanced engagement	
Retail Cust. Metrics	SQL · Power BI	Retail operations KPI dashboard; optimized query layer	Enterprise	Reduced latency	
Retail Cust. Analytics	Python · sklearn	Churn prediction + segmentation; Random Forest + k-means	100K+ users	**85%** accuracy	
Healthcare Analytics	DAX · Power BI	Clinical outcome models; executive reporting layer for operational KPIs	Multi-dept	Improved decisions	
Playing with ETL	Azure · Python	Automated pipeline orchestration using Apache Airflow DAGs	Daily pipe	**5 hrs/wk** saved	
Pipeline Trend	SQL · Power BI	GTM forecasting dashboard; trend decomposition + scenario analysis	GTM-wide	Data-driven GTM	
Customer Intelligence	SQL · Python	Decision intelligence framework; NPS + CLV + churn analytics	Exec-level	C-suite insights	
Campaign Finance	DAX · Power BI	Campaign spend + multi-touch attribution modeling; budget optimization	Multi-channel	**15%** ROI gain	

Full portfolio – 30+ dashboards, ML models, and ETL pipelines View All

AWARDS & PROFESSIONAL RECOGNITION

OPTIMIZELY · 2025

Formal Bonusly Recognition

Peer-nominated for exceptional cross-functional BI impact. Awarded by senior leadership for architecting the $200M+ ARR analytics framework.

View credential

OPTIMIZELY · 2025

Cross-Channel Peer Recognition

Acknowledged by 5+ cross-functional teams — Sales, Product, Engineering & Marketing — for analytical leadership and data quality advocacy.

View credential

SHOPUP · Q4 2023

Best Performing Team Award

Delivered the Sales Sight 360 suite — operational backbone for 150+ DAU across regional sales operations.

View credential

SHOPUP · 2024

Pace Over Perfection Award

Recognized for driving 35% efficiency gains through rapid automation and building a self-service analytics culture across 10+ teams.
