EXECUTIVE PROFILE

Trusted by VP- and C-suite stakeholders across **$600M+** in combined ARR, a **commercial intelligence specialist** who builds the analytics infrastructure, governance layer, and executive narrative that turns raw data into revenue decisions — not a generalist, but an **embedded analytics authority** for $100M+ ARR SaaS and marketplace businesses.

At **Optimizely** (**$400M+** ARR), built **zero-to-one analytics infrastructure** as **sole analytics owner**: designed the **north-star KPI framework** and **self-serve platform** adopted by **550+** users, surfaced **$20M+** in untracked pipeline, and ran **15+** concurrent **A/B experiments** that directly shaped executive GTM and retention strategy. At **ShopUp** (**$195M+** GMV), owned supply chain intelligence, credit risk models, and a **data-contract governance layer** that eliminated metric discrepancies by **90%**.

Combines **analytical depth** — experimentation, cohort analysis, predictive modelling — with the **executive fluency** to translate insight directly into pricing, product, and growth decisions.

PROFESSIONAL EXPERIENCE

Optimizely

Jan 2025 –Present

Senior Business Intelligence Analyst –Analytics & Data

Dhaka, Bangladesh (Remote, Global)

Digital Experience Platform · $400M+ ARR · Global SaaS · 1,000+ Employees

- **Sole analytics owner and roadmap lead** for **10+** departments — architected the **BI Centre-of-Excellence**, **business intelligence strategy**, and **self-serve BI platform**, presented the quarterly **analytics roadmap** ratified by VP Analytics via structured **stakeholder management** and **cross-functional collaboration**, serving **550+** users and driving **GTM strategy** across a **$400M+** ARR portfolio.
- Defined enterprise **north-star KPIs**, **semantic layer**, and **data-contract governance** — standardising ARR, MRR, CLV, ARPU, NRR, CSAT, and Win Rate with **data lineage**, **row-level security**, and **GDPR** controls — reducing reporting inconsistencies by **30%** and resolving **6+ months** of cross-team metric misalignment.
- Ran **15+** concurrent **A/B experiments** with full **statistical power analysis** and **Bayesian hypothesis testing** — improving **retention modelling** accuracy by **18%** and cutting churn-risk identification lag by **2+ weeks**.
- Integrated **Salesforce** (Leads, Opportunities, Accounts), **Marketo**, and **NetSuite** via **Snowflake** — applied **predictive lead scoring** and **Bayesian attribution** to surface **20%** more marketable leads, lift campaign ROI by **30%**, and accelerate pipeline processing by **60%**; ingested and modelled **Clari** revenue intelligence data from the cloud data warehouse and via **Salesforce** integration — enabling **pipeline health analysis**, **forecast accuracy** reporting, and real-time **deal risk** signals for GTM leadership.

- Architected **Snowflake / dbt ETL/ELT pipelines** processing **500M+** rows/day at sub-second query response — certified **star-schema dimensional models** with full **data validation**, **CI/CD** (GitHub Actions), and **UAT** sign-off across **3** data domains.
- Delivered **pipeline health analysis** and **forecast accuracy** reporting that surfaced **$20M+** in untracked pipeline — presented via **executive data storytelling** to C-suite and VP stakeholders to drive **decision velocity** and **funnel efficiency** across a **$400M+** ARR GTM motion; applied **root-cause analysis** and **operational diagnostics** across **SQL**, **Python**, and **Power BI** to identify **conversion rate** drop-offs and **pipeline health** bottlenecks, directly informing commercial strategy.
- Delivered **20+** enterprise **Power BI** dashboards via **Power BI Service** using **Advanced DAX**, **semantic models**, **Power Query**, **paginated reports**, and **deployment pipelines** across **10+** departments — **data visualisation** and **dashboard development** that eliminated **65+ hours** of monthly **reporting automation** and enabled always-on performance tracking for VP and C-suite stakeholders.
- Mentored **5+** analysts via **code reviews**, **cross-training**, and a structured **onboarding programme**; established **CI/CD guardrails** and **self-service guardrails** — cutting dashboard failure rates by **40–50%**, ad-hoc requests by **30%**, and analyst ramp time by **3 weeks**.

ShopUp (Mokam CPG)

Oct 2023 –Dec 2024

Sales Data Analyst –Sales Capability & BI

Dhaka, Bangladesh

B2B Commerce Platform · $195M+ Annual GMV · Series B · Bangladesh

- **Owned end-to-end analytics** for a **B2B marketplace** processing **$195M+** in annual sales across **600,000+** retailers and suppliers — defined **marketplace metrics**, **supply chain KPIs**, **lifecycle intelligence**, and **working-capital efficiency** analytics for the full revenue operation.
- Served as **primary strategic data partner** to VP Sales, Supply Chain, and Finance — translated marketplace data and **competitive intelligence** into **pricing strategy** and distribution recommendations via **analytical memos** and **executive data storytelling**, driving a **20%** uplift in fill rates and **35%** reduction in working-capital-at-risk YoY across **5** regions.
- Built **slow-moving stock prediction models** using **time-series analysis** and **regression modelling** — auto-alerting departments **30 days** ahead of restocking thresholds, freeing **45%** of warehouse capacity and driving **20%** incremental sales from reactivated inventory.
- Applied **credit risk analytics**, **predictive deposit-tracking**, and **lifecycle analytics** on retailer payment behaviour — delivering **35%** deposit growth YoY, improving fund utilisation by **30%**, and cutting manual reconciliation by **40%**.
- Deployed **25+ Power BI** dashboards with **Advanced DAX**, **Power Query**, and **semantic models** serving **150+** DAU — including **P&L**, **gross margin**, **EBITDA**, and **unit economics** models at warehouse and category granularity; supplemented by **Metabase** for operations **self-service** — reduced manual data preparation by **50%** (**~25 hrs/week**) via **ETL/ELT pipelines** in **Python**, **Azure Data Factory**, and **SQL Server** with **star-schema** modelling.
- Applied **cohort analysis**, **funnel analysis**, and **retention analytics** (LTV / CAC, RFM) to identify high-risk segments, reducing MoM churn by **12%** — established **data contracts** and **data dictionaries** (Atlan / Confluence), eliminating metric discrepancies by **90%** and accelerating new-analyst onboarding by **3 weeks**.

AponTech Ltd.

Dec 2022 –Sep 2023

Associate Data Analyst –MIS, Product & Growth Analytics

Dhaka, Bangladesh

Consumer eCommerce/FMCG App · 100K+ Active Users · Dhaka

- **Sole analyst** for a **100,000+** user **eCommerce/FMCG** app — achieved **85%+** forecasting accuracy (vs. **~62%** rule-based baseline) by building **ML models** in **Python (scikit-learn, XGBoost, pandas)** on discount sensitivity and SKU-level demand patterns via **regression modelling** and **statistical hypothesis testing**.
- Designed targeted promotional strategies via **lifecycle analytics**, **funnel analysis**, and **customer segmentation** (k-means / RFM) — retained **20,000+** high-value users and drove a **50%** basket-size increase (**$16 → $24 avg. order**), improving **CLV**, **ARPU**, and **conversion rate** metrics org-wide.
- Executed **cohort analysis** and **product-led growth analytics** on **100,000+** users using **SQL** and **Power BI** — informing campaign decisions that optimised ROI by **22%**.

- Automated **anomaly detection**, **fraud pattern identification**, and supply chain risk alerts using **Python** — eliminating **10+ hrs/week** of manual review and preventing an estimated **$150K** in annual revenue leakage.
- Built **Power BI** KPI scorecards and **self-service dashboards** with documented **DAX measures** and **data governance** standards; also worked with *Tableau* and *Looker* for **data visualisation** and ad-hoc visual exploration, serving **50+** stakeholders and reducing ad-hoc reporting dependencies by **30%**.

DataWorks Ltd. (Data Crafters LLC)

May 2022 –Nov 2022

Data Analyst Intern –Data Engineering & Enterprise Reporting

Houston, TX, USA (Remote)

US-Based Data Consultancy · Multi-Sector Client Base · Houston, TX

- Engineered **ETL pipelines** and optimised legacy **SQL** via **stored procedures**, **CTEs**, and **query-tuning** techniques — reducing execution time by **25%** across **3** business units.
- Designed **campaign KPI dashboards** in **Power BI** applying **dimensional modelling** and **DAX measures** — adopted by **3** business-unit heads for ongoing cross-functional performance tracking.
- Conducted **EDA** and **data profiling** in **Python** — documenting schema inconsistencies, null patterns, and duplicates into **data quality reports** with **data lineage** annotations, adopted as the team's UAT and onboarding standard across **6** analysts.
- Gathered requirements from Operations Directors and Campaign Managers across **3** business units, translated business needs into **ad-hoc SQL queries** and **analytical views**, and documented **metric definitions** and **data dictionary** entries — supporting operational decision-making and establishing foundational **data governance** practices.

EDUCATION

Bangladesh University of Professionals

AWARDS & PROFESSIONAL RECOGNITION

Senior Leadership
OPTIMIZELY · 2025

Nominated by **5+** teams & endorsed by VP Analytics for transforming reporting infrastructure across a **$400M+** ARR portfolio.

Cross-Channel Peers
OPTIMIZELY · 2025

Acknowledged by **5+** teams (Sales, Product, Eng, Marketing) for analytical leadership & org-wide data quality advocacy.

Best Performing Team
SHOPUP · Q4 2023

Delivered **Sales Sight 360** — the operational backbone for **150+** DAU across regional sales operations.

Pace Over Perfection
SHOPUP · 2024

Recognised for driving **35%** efficiency gains via rapid automation and building self-service analytics across **10+** teams.

Full recognition history & proof of award: **LinkedIn** • **Portfolio**
